DP SuperSilent 3 Universal [7821]

For first-class cutting results. Precise in operation, but incredibly quiet.

The diamond-tipped circular saw blade is designed for **longitudinal, cross** and **planing cuts** and is primarily used on sizing circular saws with a scoring unit.

It is ideally suitable for processing coated / uncoated wood-based materials and dry solid wood.

Thanks to innovative technologies and optimised tooth geometry, it consistently delivers clean, **tear-free** cutting results whilst significantly **reducing noise levels**.

Innovation: High-quality diamond tooth with MicroGeo

Innovation Direct-Chip-Guide: Chips are directed directly into the ChipBelt® beneath the 'T-sleeve'

ChipBelt® innovation: For efficient chip removal

Promotion prices excluding VAT

Universal: For processing wood and wood-based materials, both coated and uncoated; for first-class cutting results

Diamond-tipped circular saw blade: can be eroded twice, making it incredibly cost-effective

Innovative: Significantly reduced risk of injury thanks to MicroGeo; Optimal chip removal with the stepped ChipBelt®

The ChipBelt®-cutting surface reduces air turbulence, which results in a noise reduction of 20 dB
